Small wind slab near Fairy Lake

Fairy Lake
Bridger Range
9/29/2019
Code
SS-AS-R1-D1-S
Elevation
9000
Latitude
45.90430
Longitude
-110.95800
Notes

From e-mail: "The only places one could ski were wind pockets blown into the limestone fin features that in places were well over a foot. These spots were also where the snow was weirdest/posed any sort of avalanche hazard as you pretty much had to find a wind slab in order to ski anything! One group reported triggering a slab in one of these spots, but vis was too poor to see."
