Remotely triggered avalanche on Bald Mountain, Jardine, MT

Jardine
Out of Advisory Area
1/6/2021
Code
Latitude
45.09320
Longitude
-110.56900
Notes

On a wind loaded, rocky slope off the summit of Bald Mountain we triggered a remote slide about a 100 across from us while skiing. Conditions elsewhere in the area were decent, but the exposed, wind loaded slopes showed activity with whoomping and cracks, and the one avalanche. None where hurt or caught. Conditions were as advised in the avalanche report.
