Cooke City, More Avalanche Activity

Date
Thu, 01/25/2024 - 18:00
Activity
Skiing

From email: "Photo of a recent slide observed today, north of Cooke. East aspect, 9k'.

We also remotely triggered a different, small avalanche today from safe terrain while eating our lunch!

And had an ECTP3 and ECTV on the Jan. 5th interface (30cms down), also on easterly aspects.

Widespread collapsing today too."

Region
Cooke City
Observer Name
Beau Fredlund
