 Co-ord: 45.81990N, -110.93320W  
 Slope Angle: 27°  
 Wind Loading: yes

Stability: **Poor**  
 Air Temperature: -8°C  
 Sky Cover: **BKN**  
 Precipitation: **NO**  
 Wind: **W Light Breeze**

HS110  
 Stability Test Notes

Layer No  
 45-55: Pr

Specifics: Pit is adjacent to avalanche: flank; Recent activity on similar slopes; Recent activity on different slopes

Notes: We were unable to get to the crown, so dug on an adjacent slope about 500' to the south.
