

Cracking on wind slabs in Beehive

Beehive Basin
Northern Madison
2/7/2019
Code
Latitude
45.32670
Longitude
-111.38700
Notes

Skiers got 4-6" wind pockets to propagate in the trees at lower elevations in Beehive Basin. Wind slabs were thicker in more exposed areas and likely more reactive at higher elevations.

Number of slides
1
Number caught
0
Number buried
0
