

Gallatin Canyon

Date

Fri, 03/05/2021 - 11:09

Activity

Skiing

While touring above the canyon this morning, i noticed a very recent wet slide (would guess this incident occurred yesterday afternoon, March 4th). This was a skier triggered slide on a E aspect at an elevation of 7200. This slide was roughly 50 feet wide and ran about 50 feet, I estimated this crown to be 2-3 feet deep, slid all the way to the ground. This occurred below a steep roller.

Region

Northern Madison
