

Ernest Miller Ridge

Date

Tue, 01/04/2022 - 12:00

Activity

Skiing

Quick snow pit at approximately 44.9556, -111.1299 (Gaia). 145 cm depth. 0 to 10 cms off ground was depth hoar, not particularly large grains. Slight crust at 125 cm from ground. ECTX (no initiation or propagation). Top 200+ vertical feet of Ernest Miller Ridge is wind slab. We skied (party of 5) lower slopes and found good skiing in slightly consolidated snow.

Region

Southern Madison

Location (from list)

Ernie Miller Ridge
