

Hebgen Mtn Summit

Date

Sat, 01/15/2022 - 13:20

Activity

Skiing

ECT 28 - 15cm from the ground on depth hoar - Q2

PST 50% - 30cm from the surface on buried surface hoar

No changes in hardness greater than one step.

South aspects have an inch crust layer with soft unconsolidated snow underneath. Overall depth around 2.5'.

Evidence of lots of tree bombs and a few rollers from the sun all this week.

East aspects were the place to be today.

Region

Southern Madison

Location (from list)

Hebgen Lake

Observer Name

MICHAEL K Myers
