

# Northern Bridgers

Date

Wed, 01/19/2022 - 10:35

Activity

Skiing

GNFAC,

Skied up in the Northern Bridgers today, ski conditions greatly exceeded expectations. 2" of snow sat on a bulletproof surface in most places, ski crampons were the ticket. We observed natural and human triggered small loose dry avalanches. Winds were calm except at ridgeline where they were a steady moderate and blowing snow into 4-5" deep reactive windslabs.

thanks! Bring on the snow!

Spencer

Region

Bridger Range

Location (from list)

Hardscrabble Peak
