

Result on the Ramp

Date

Sat, 02/26/2022 - 16:00

Activity

Skiing

Was digging a pit halfway up the ramp, straight east facing aspect not expecting to get anything but got a somewhat planar CT24 90cm up in a 145cm snowpack. Did not perform an ECT however was surprised to even get a break. Broke on facets deep in the pack. Not the most worrying thing but was still a little surprised by it!

Region

Bridger Range

Location (from list)

The Ramp

Observer Name

Colton Ellingson
