

Wet loose activity from days past

Date

Sat, 03/05/2022 - 12:25

Activity

Skiing

Observed a lot of wet loose activity from the past few day's warm spell while guiding in Bacon Rind today. Nothing super noteworthy avalanche-wise as far as today's conditions go, but holy hell is the skiing bad down there. Robust MF crust on all aspects, I'm anticipating the classic crust/facet combo to develop shortly so that might be a concern once we get more snow soon, or dare I say IF we get more snow...

Region

Southern Madison

Location (from list)

Bacon Rind
