

Avalanche in Beehive Basin

Date

Tue, 05/03/2022 - 16:00

Activity

Skiing

5/3/22 at approximately 4:00pm a storm slab avalanche occurred in beehive basin on a west aspect @9000 ft. This slab was 6-8" deep and propagated around 50'. No one was buried, however we aren't sure if anyone was caught because we were not the party who triggered this avalanche. We did witness the party drop in but quick went out of sight.

Region

Northern Madison

Location (from list)

Beehive Basin

Observer Name

Harrison Bigos-Lowe
