

## Cornice crack triggered by skiers

Mt Blackmore  
Northern Gallatin  
2/11/2023  
Code  
C-ASu  
Elevation  
9600  
Aspect  
NE  
Latitude  
45.44340  
Longitude  
-110.99700  
Notes

Also of note, as we traversed a corniced ridge later in the day, two of our group members simultaneously came too close to the edge of a [cornice](#) and it broke away, but did not fall down the slope. Fortunately, everyone was alright, but it was a close call and we will definitely be more mindful next time. We believe the [cornice](#) was made more sensitive by the warm weather over the past few days.

Number of slides  
1  
Number caught  
0  
Number buried  
0  
Avalanche Type  
Cornice fall  
Trigger  
Skier
