

Shooting crack on Grassy Mtn above Brackett Creek

Date

Fri, 02/17/2023 - 03:40

Activity

Snowshoeing

We were snowshoeing up Grassy Mountain on Feb 15. We were following someone else's tracks up to a SW facing slope between 35 and 40 degrees at 6400 feet (directly across from Bridger Bowl). We realized the other person had probably turned around because of this crack in the snowpack directly above a gully with terrain traps. We did the same.

Region

Bridger Range

Location (from list)

Brackett Creek
