

New snow avalanches North Bridgers

Date

Sun, 03/05/2023 - 12:35

Activity

Skiing

While skiing Shafthouse Hill I intentionally [trigger](#) a [wind slab](#) on a small slope. The [slab](#) was actively forming with the new storm snow. I triggered it by ski cutting the [slab](#) at the rollover. It broke very easily and was approximately 15cm thick.

[Aspect](#): SE

Slope angle: 36 degrees

Elevation: 8315'

Weather conditions @ 1130, overcast and moderate snowfall, 18 degrees F, winds SSE 15-20 mph.

Region

Bridger Range

Location (from list)

BRIDGER RANGE
