## Wet snow avalanches at Bridger

Bridger Bowl Bridger Range 4/25/2023 Code WL-N-R2-D2 Elevation 7800 Aspect E Latitude 45.81560 Longitude -110.92300 Notes

Yesterday 4/25, Walked to the top of Pierre's Knob. The snow was unconsolidated mush, very sticky skiing. While hanging out at the top shack (at 1130am) I heard 3 large avalanches running in the south bowl, white out conditions so was unable to see how big the slides were they sounded like they ran a long ways.

Number of slides 3 Number caught 0 Number buried 0 Avalanche Type Wet loose-snow avalanche Trigger Natural trigger R size 2 D size 2 Problem Type Wet Snow Snow Observation Source Wet snow avalanches at Bridger Slab Thickness units centimeters Single / Multiple / Red Flag **Multiple Avalanches** Advisory Year 22-23
