

As expected in S Brackett

Date

Mon, 12/11/2023 - 14:35

Activity

Skiing

NE aspect 7600 ft.

Hand pit - 40 cm deep

First 15cm of the snowpack from the ground up, was rotten, un-compacted snow, with a thin hard crust.

Top 25 cm was compacted snow, density 4F.

S Brackett Cr road has a few inches over most of it. Snowpack is still too shallow to allow for much skiing.

Region

Bridger Range

Location (from list)

Brackett Creek

Observer Name

C. Robinson
