Shooting Cracks up Dudley Creek

Date Tue, 02/04/2025 - 16:40

Shooting cracks on Tick ridge in the Dudley drainage. This <u>slab</u> from my <u>ski cut</u> was about 20" deep and 60' wide. It's NE facing so pretty wind blown. I took a gladed path but in more open sections I imagine this would have propagated much wider and further downslope. Probably 35 degrees here.

Region Northern Madison Location (from list) Dudley Creek Observer Name Stefan Budac
